Innovative Pedagogical Strategies in VPET Series is funded by the Quality Enhancement Support Scheme (QESS) on the project of "Development of Effective Pedagogical Practices and a Cross-institutional Online Sharing Platform for Hong Kong's Vocational Education and Training (VET)".

On completion of this workshop, the participants would be able to:

- familiarise with the characteristics of young mentees; and
- develop effective mentoring skills to help students learn more effectively in workplaces.

VPET in Hong Kong

"VPET has been playing a pivotal role in broadening the learning opportunities for school leavers and in-service personnel as well as nurturing the requisite human capital in support of Hong Kong's development". (LC, 2015, P. 9)

"Mainstream education is not a straightjacket that fits all young people as everyone has his or her own interests and abilities. The government should re-establish the of vocational education in our education system and guide the younger generation in choosing their career". (LC. 2015, P.14)

"Adequate and quality manpower resources are the key to our sustainable socio-economic development". (Ibid.)

What is Mentorship?

- Mentorship is the process where a mentor works with and educates a mentee to help foster skill development and professional growth.
- The mentor shares his/her skills, knowledge, techniques, best practices and experience to provide a comprehensive hands-on training experience for the mentee.
